## ACCORDING TO ECE R90

### BRAKE PADS APPROVED ACCORDING TO ECE R90

The ECE R90 regulation specifies design, construction, and performance requirements and test protocols for replacement brake parts for motor vehicles driving on public road.

AP Racing has applied for approval according to the ECE R90 regulation for the full range of friction materials that can potentially be used on public roads.

#### Your safety – your benefits

Type-approval to ECE R90 is required for all replacement brake linings throughout the European Union and in non-European countries that have adopted ECE Regulations.

This way, all compounds and vehicles are checked and the most severe combinations tested on track, for the consumer to get a very safe and secure product.

#### High standard throughout

The ECE R90 regulation requires stringent tests for speed sensitivity and temperature performance of brake pads. Factory and test equipment approval is also part of the R90 homologation. It involves engineers inspecting and accrediting the factory once a year and continuous sampling of the brake pad products.

It is your guarantee for reliable OEM replacement quality. ECE R90 will be continuously implemented on AP Racing products in 2021 and 2022.

### PLAQUETTES DE FREIN APPROUVÉES SELON LA NORME ECE R90

La réglementation ECE R90 définit les exigences de conception, de construction et de performances ainsi que les protocoles de test des pièces de freinage de rechange destinées aux véhicules routiers à moteur.

AP Racing a bien sûr demandé l'approbation selon la réglementation ECE R90 de l'ensemble de sa gamme de matériaux de friction pouvant être potentiellement utilisés sur la voie publique.

#### Votre sécurité – vos avantages

Une approbation de modèle ECE R90 est requise pour toutes les garnitures de frein de rechange dans l'Union Européenne mais aussi dans les pays non européens ayant adopté les réglementations ECE.

De cette manière, tous les composés et tous les véhicules sont contrôlés, et les combinaisons les plus exigeantes sont testées sur piste, afin que le client bénéficie du produit le plus sûr possible.

#### Des standards élevés généralisés

The ECE R90 regulation requires stringent tests for speed sensitivity and temperature performance of brake pads. Factory and test equipment approval is also part of the R90 homologation. It involves engineers inspecting and accrediting the factory once a year and continuous sampling of the brake pad products.

C'est votre garantie pour une qualité et une fiabilité des pièces de rechange dignes des pièces d'origine. La réglementation ECE R90 continuera d'être appliquées aux produits AP Racing en 2021 et 2022.

### PASTILLAS DE FRENO CON HOMOLOGACIÓN ECE R90

En el reglamento ECE R90 se especifican tanto los requisitos de diseño, fabricación y rendimiento como los protocolos de prueba de las piezas de los frenos de recambio de los vehículos de motor que circulan por carretera.

AP Racing ha solicitado la homologación según el nuevo reglamento ECE R90 de la gama completa de materiales de fricción que podrían utilizarse en las carreteras convencionales.

#### Su seguridad, su beneficio

En la Unión Europea y en los países extraeuropeos que hayan adoptado los reglamentos ECE se exige que las garniciones de los frenos de recambio tengan la homologación ECE R90.

De esta forma se comprueban todos los compuestos y vehículos y se prueban en pista las combinaciones más exigentes con el fin de ofrecer al consumidor un producto muy seguro y estable.

#### Los estándares más altos

El reglamento ECE R90 requiere la realización de pruebas exhaustivas relacionadas con la sensibilidad, la velocidad y la temperatura asociadas al rendimiento de las pastillas de freno. La aprobación de la fábrica y el equipo de pruebas también forman parte de la homologación R90. Esta aprobación incluye la inspección y acreditación anual de la fábrica por parte de los ingenieros, y la obtención continua de muestras de las pastillas de freno.

Este proceso es precisamente el que le garantiza un recambio OEM fiable y de calidad. ECE R90 se implementará continuamente en productos AP Racing en 2021 y 2022.

### PASTIGLIE PER FRENI OMOLOGATE SECONDO ECE R90

Il regolamento ECE R90 specifica i requisiti di progettazione, costruzione e prestazioni, nonché i protocolli di prova per i pezzi di ricambio dei freni per gli autoveicoli che circolano su strada.

AP Racing ha naturalmente richiesto l'omologazione secondo il nuovo regolamento ECE R90 per l'intera gamma di materiali di attrito potenzialmente utilizzabili su strada.

#### La vostra sicurezza - i vostri vantaggi

L'omologazione secondo la norma ECE R90 è richiesta per tutti i rivestimenti freni di ricambio in tutta l'Unione Europea e nei paesi non europei che hanno adottato i regolamenti ECE.

In questo modo tutte le mescole e i veicoli vengono controllati e le combinazioni più esigenti testate in pista, per consentire al consumatore di ottenere un prodotto estremamente sicuro.

#### Uno standard costantemente elevato

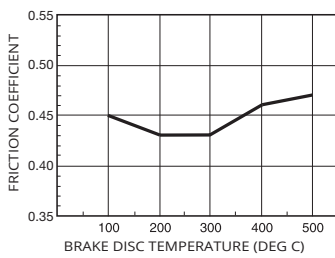

Il regolamento ECE R90 richiede test rigorosi per la sensibilità alla velocità e le prestazioni di temperatura delle pastiglie dei freni. Anche l'approvazione di fabbrica e delle attrezzature di prova fa parte dell'omologazione R90. Questa approvazione comporta l'ispezione e l'accreditamento della fabbrica una volta all'anno e un campionamento continuo dei prodotti delle pastiglie dei freni da parte di ingegneri.

È la vostra garanzia per una qualità di sostituzione affidabile dell'OEM. L'ECE R90 sarà continuamente applicato sui prodotti AP Racing nel 2021 e nel 2022.

## NRS TECHNOLOGY

**NRS**<sup>TM</sup>

AP RACING sinter brake pads are equipped with the indestructible NRS technology.

NRS<sup>TM</sup> adds a consistent matrix of raised steel hooks that facilitate a mechanical bond between brake pad back plate and friction materials. A mechanism that never fails.

Les plaquettes de frein frittées AP RACING sont équipées de la technologie indestructible NRS.

La technologie NRS<sup>TM</sup> ajoute une matrice de crochets en acier redressés qui facilitent la liaison mécanique entre le plateau de frein pour plaquette de frein et les matériaux de friction. Un mécanisme qui ne s'enraie jamais.

Las pastillas de freno sinterizadas AP RACING están equipadas con la tecnología indestructible NRS.

NRS<sup>TM</sup> añade una matriz uniforme de ganchos de acero elevada que proporciona una adherencia mecánica entre la placa de soporte de la pastilla de freno y los materiales de fricción. Este mecanismo nunca falla.

Le pastiglie freno sinterizzate AP RACING sono dotate dell'indistruttibile tecnologia NRS.

NRS<sup>TM</sup> è basato su una specifica matrice di ganci in acciaio sollevati che facilitano il legame meccanico tra la piastra di supporto delle pastiglie freni e i materiali di attrito. Un meccanismo infallibile.
